

InvoBridge Solution: Fast-Track ERP–NRS e-Invoicing Compliance

Automated Compliance. Enhanced Security. Future-Ready.

Infonomics: Trusted By Industry Leaders

Enterprise-Grade Solutions Proven In Nigeria: Over the past ten years, we have deployed scalable and standards-based digital solutions to leading organizations across Nigeria.

NRS e-Invoicing Expertise: Having worked closely with NRS at the outset of its e-invoicing initiative, we established reference patterns in key areas, including data validation, IRN/QR Codes handling, acknowledgements, and resubmission controls.

Integration With the NRS MBS e-Invoice Platform: Our approach involves adapting data mappings, implementing security protocols, and managing credentials in line with client-specific requirements. This reduces delivery risk and shortens implementation timelines.

Designed For Compliance and Control: Maker-checker workflows, immutable payload logging, and comprehensive traceability are standard features, ensuring Finance, Tax, and Audit functions maintain a robust control environment.

Value To Client

Lower Delivery Risk: Leverage a proven solution with established integrations to minimize uncertainty and accelerate delivery.

Faster Compliance: Pre-built NRS connectors, ready-made schemas, and validation rules help you achieve compliance in weeks, not months.

Operational Clarity: Gain a single point of control for status, exceptions, and resubmissions keeping Finance and Tax teams always ahead of the curve.

Smarter Cost Management: Maximize value by reusing what already works, configuring only where needed, and avoiding expensive bespoke rebuilds.

Why e-Invoicing Matters?

REGULATORY MANDATE

NRS COMPLIANCE
IS NON-
NEGOTIABLE

Transparency of
Invoicing System

Introducing InvoBridge

Navigating the mandatory NRS e-invoicing mandate presents a significant strategic challenge, shifting us from traditional invoicing to a complex real-time system that carries compliance risks and could strain IT resources.

To address this, we propose InvoBridge, an agile and ERP-agnostic gateway that can seamlessly connect existing financial systems to the NRS MBS platform.

The solution is built to eliminate complexity and fully automate the transaction lifecycle, covering everything from validation and submission to customer delivery and auditing.

By ensuring every transaction is accurate, compliant, and audit-ready, InvoBridge turns this regulatory requirement into an opportunity for greater operational efficiency and a stronger customer experience.

InvoBridge Overview

Multi ERPs Ingestion & Mapping: REST
API/Secure File; Fields
Transforms and Mapping

Config & Security: Per-Entity
Credentials, Templates;
OAuth2/TLS, Vault/KMS,
RBAC

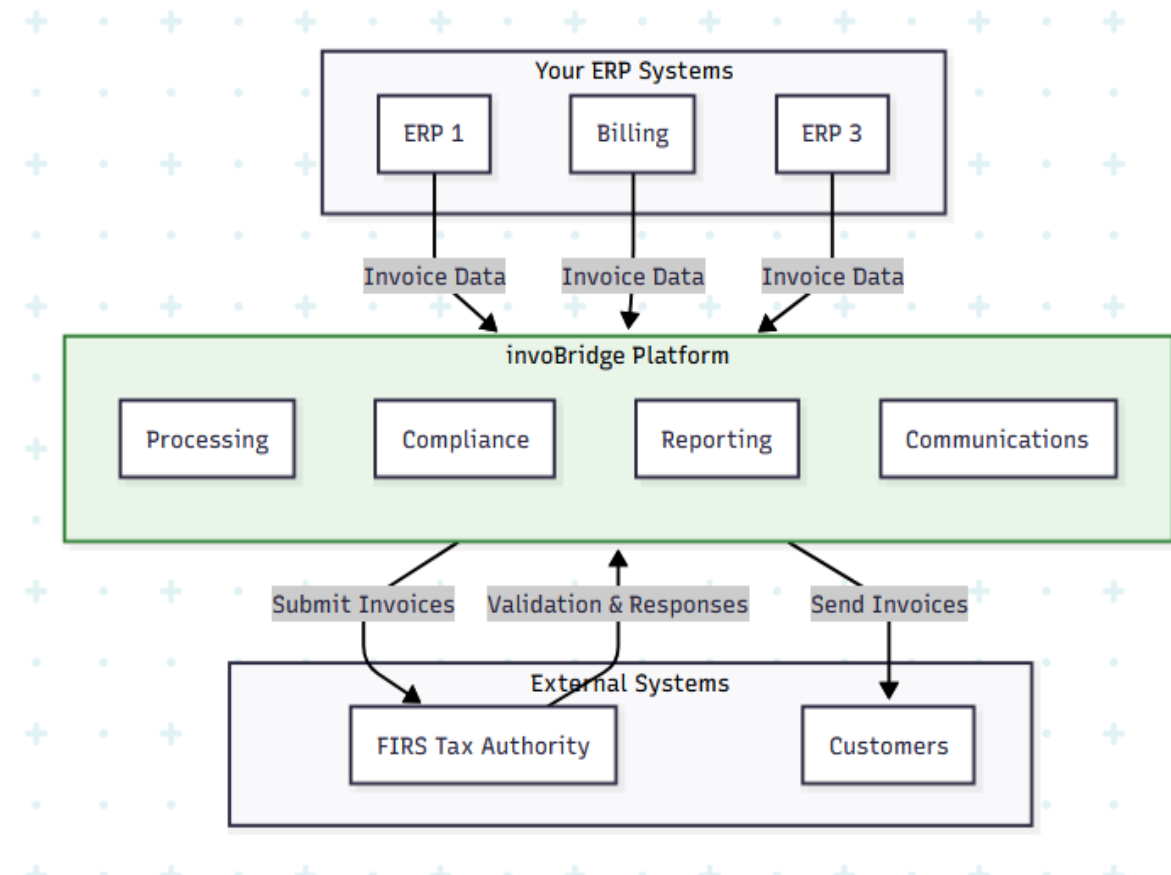

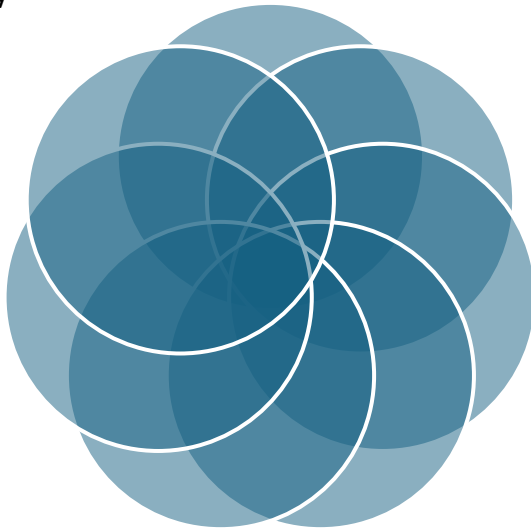

Monitoring & Audit:
Dashboard, Resubmits,
Exports; Immutable Logs
of Payloads & Emails

PDF & Customer Email:
Render/Attach PDF With
Embedded QR; Send to
ERP Customers/Contacts

Validation & Compliance: Required
Fields (incl. customer
email), Tax/TIN, Business
Rules

NRS Submission: JSON
over HTTPS; Real-Time
API & Scheduled Batch
With Retries

Responses & Keys:
Capture IRN/QR,
ACK/REJECT; Optional
Write-Back to ERP

InvoBridge Architecture

Architecture: Lamda-like Architecture – API for Near/Realtime and End of Day Batch To Ensure Nothing Is Missed Out

Integration Channels / Upload Modes

- **System-to-System Integration**
 - REST APIs for near/real-time invoice transmission
 - Secure File Drop for scheduled batch uploads
- **Manual User Upload Interface**
 - Web-based drag-and-drop file upload
 - Supports Excel and flat files for users without direct system integration
 - Uploaded files are validated, processed, and queued for automated submissions

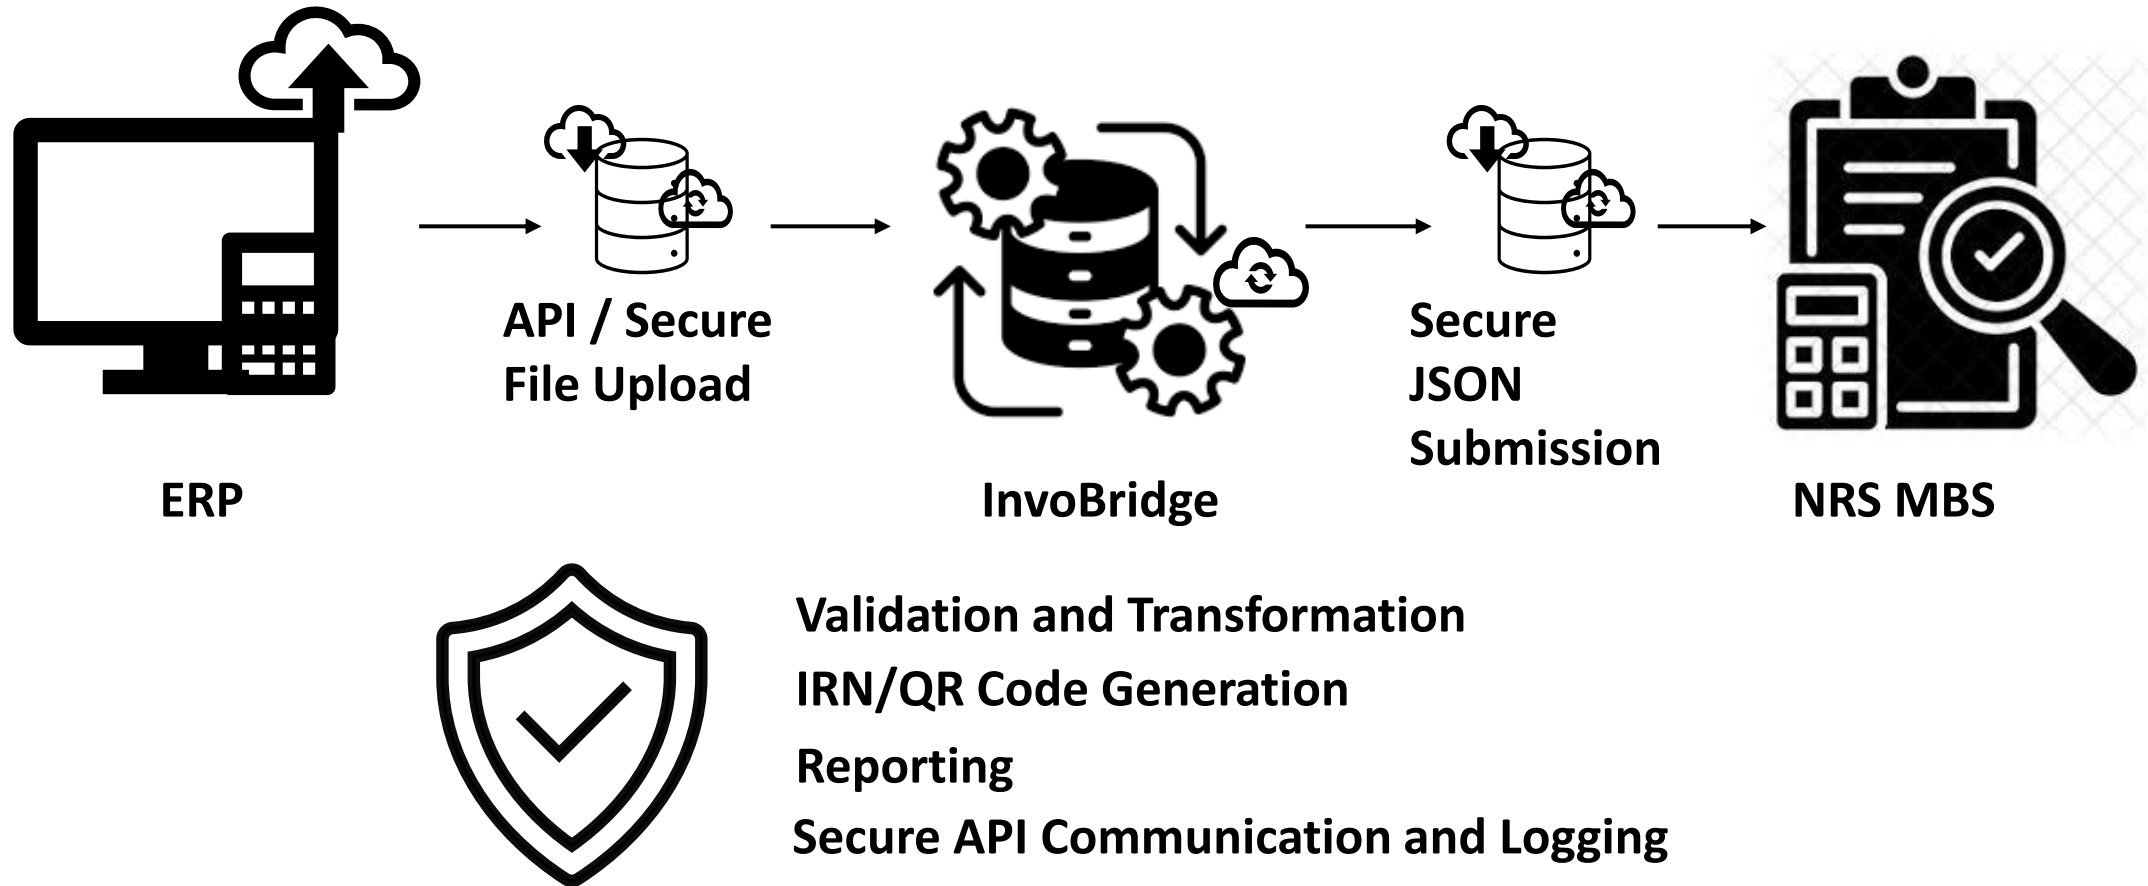

Connectors: REST API, and Secure File Drop (CSV/JSON/XML)

Data Domains: Invoices, Customers (incl. email/contact), Items, Taxes, Cancellations/Adjustment, Payment Status

Mapping Engine: Configurable Field Mappings & Transformations (ERP Invoice/Lines → NRS JSON)

Architecture: ERP via InvoBridge

Functions: Validation & Compliance

Pre-Submission Checks: Required Fields (e.g., Customer Email, TIN, Tax Breakdown), Totals, Currency Rules

NRS Ruleset: Structure, Codes, Date Formats, Corrective Flows

Business Rules: Maker–Checker Can Be Added On Request Where Required

Pre-submission checks

- Customer email
- TIN
- Tax breakdown
- Totals

FIRS ruleset

- Structure
- Codes
- Date formats
- Corrective flows

Business rules

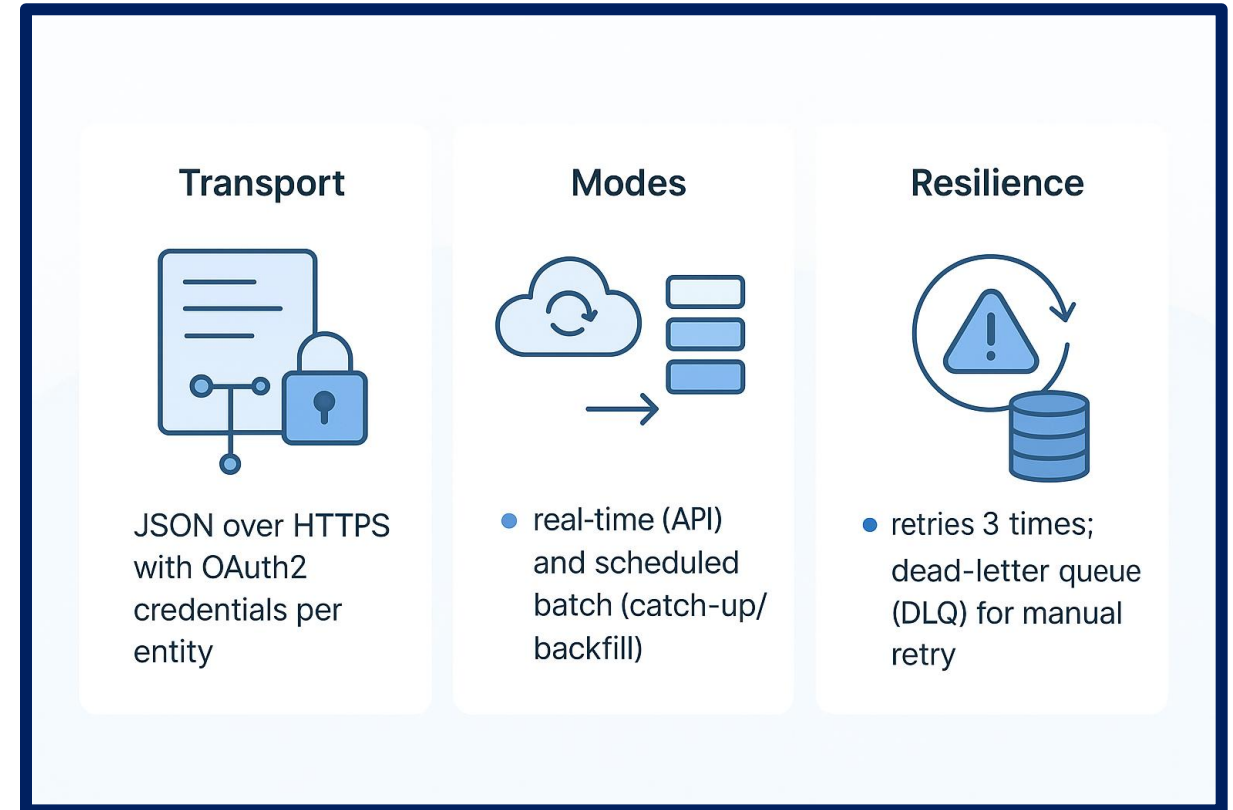

- Maker-checker can be added on request

Functions: Submission To NRS (MBS)

Transport: JSON Over HTTPS with OAuth2 Credentials Per Entity

Modes: Real-time (API) and Scheduled Batch (Catch-up/Backfill)

Resilience: Retries 3 times; Dead-Letter Queue (DLQ) for Manual Retry

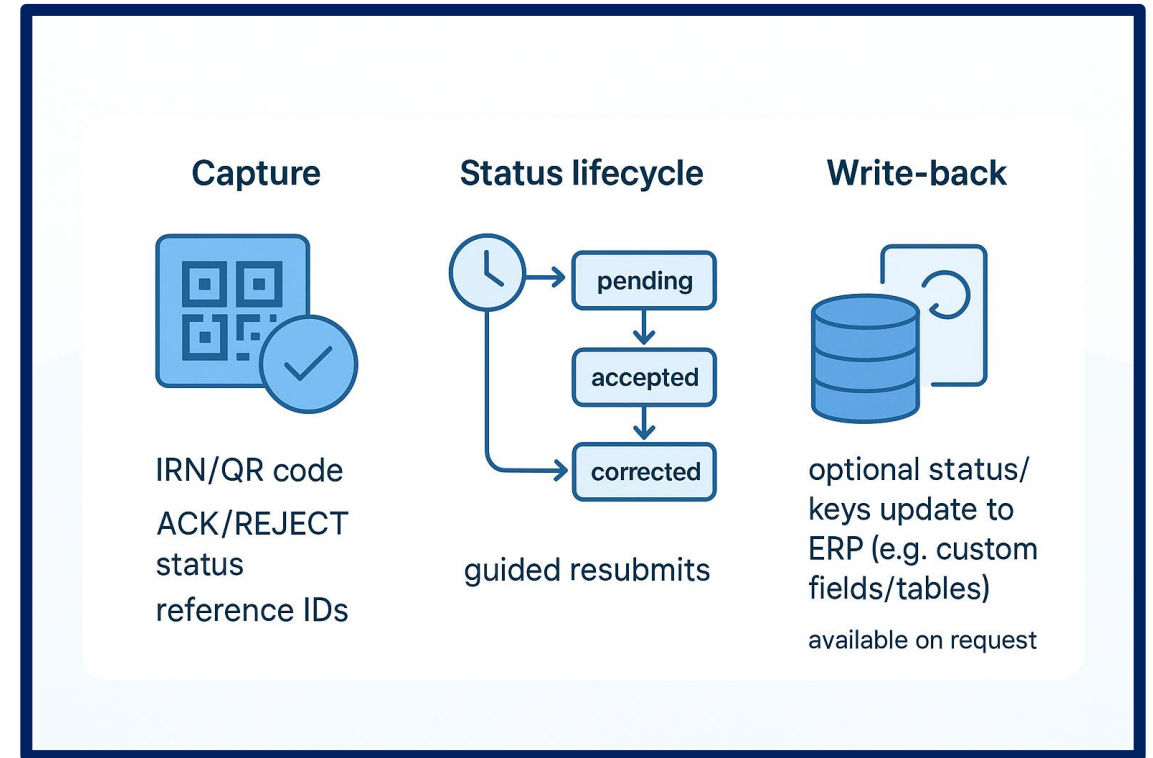

Functions: Response Handling

Capture: IRN/QR Code, ACK/REJECT Status, Reference IDs

Status Lifecycle: Pending → Accepted/Rejected → Corrected; Guided Resubmits

Write-Back: Optional Status/Keys Update to ERP (e.g., custom fields/tables) Available On Request

Functions: Communications

Realtime Views: Queues, Success/Failure, Resubmits

Filters & Drill-Downs: By Invoice Contents

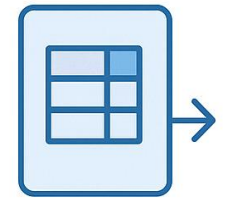

Exports & Schedules: CSV/XLSX

Realtime views
queues, success/
failure, resubmits

**Filters &
drill-downs**
by invoice
contents

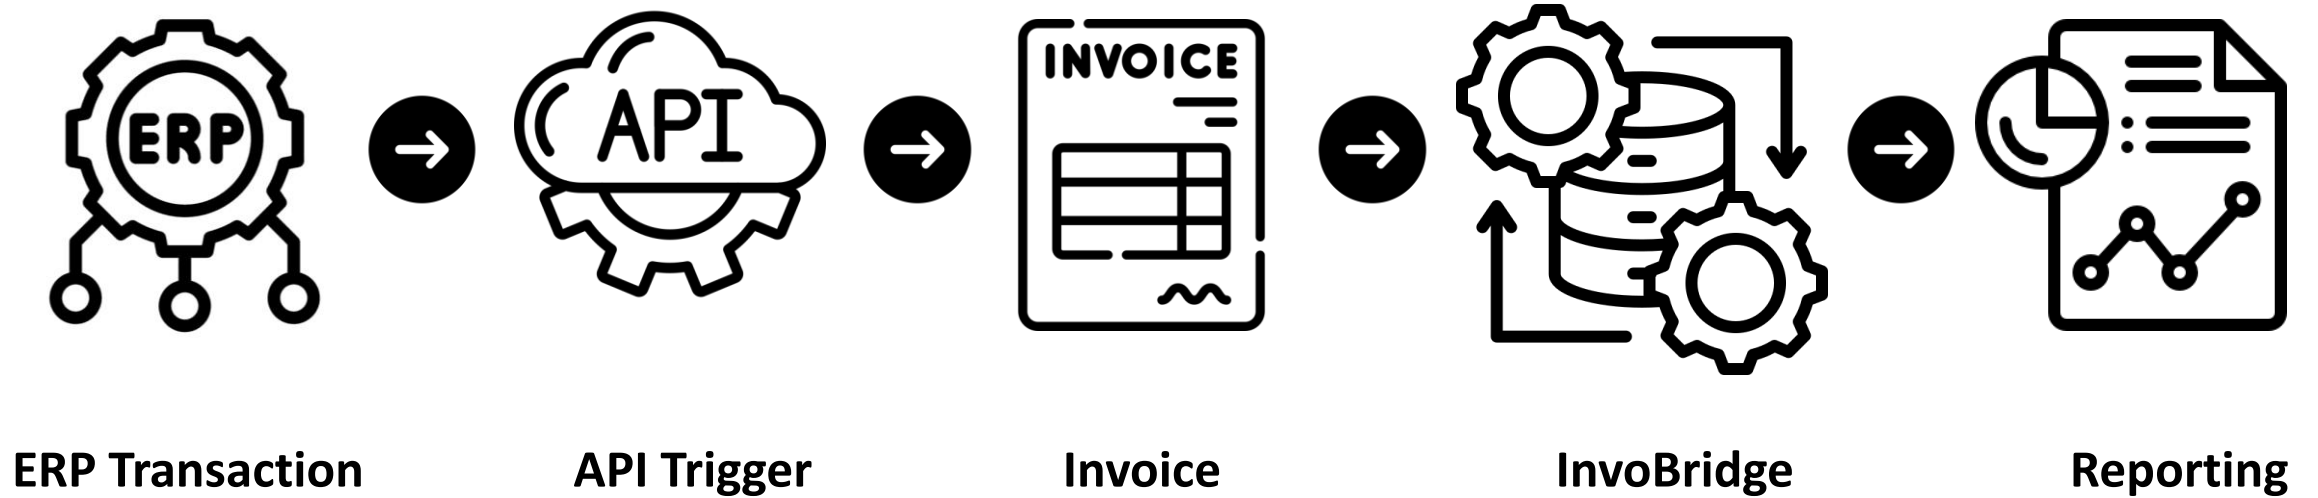

**Exports &
schedules**
CSV/XLSX

Benefits of Integration via InvoBridge

Criteria	ERP via InvoBridge
Compliance Visibility	✓ High
Audit & Logging	✓ End-to-End
Speed of Implementation	✓ Faster
Scalability	✓ Yes
Integration Cost	✓ Lower
Deployment Risk	✓ Controlled

Demo Flow

Conclusion

Implementing InvoBridge:

Reduces costly errors by automating critical processes and eliminating manual mistakes.

Enhances efficiency across teams, freeing up valuable time and resources to focus on growth.

Guarantees compliance with regulatory requirements, lowering risk and building stakeholder confidence.

Prepares your business for scalable digital operations, ensuring you are future-ready and equipped to expand seamlessly.
