NRS E-Invoicing Is Now the Law of Business

There is no opting out for businesses in scope, and the scope is expanding.

MANDATORY

It's Mandatory

NRS e-invoicing is now the law. Businesses in scope must send structured invoices for regulatory clearance.

COST

The Cost of Waiting

Errors, missed submissions, penalties and reputational damage await businesses that treat this as an afterthought.

OPPORTUNITY

The Real Opportunity

Businesses that get ahead turn a compliance deadline into a smarter, more digital way of working.

Who Needs to Comply, and When

NRS e-invoicing is rolling out in phases. Exact dates are set by NRS and can change.

LARGE

Above ₦5 billion revenue / year

Already required. Compliance monitoring is active.

MEDIUM

₦1bn – ₦5 billion revenue / year

Being brought in during 2026.

OTHER

Other VAT-registered businesses

Expected to join by 2027 under the new tax law.

Confirm your exact category and dates with NRS or a qualified tax adviser.

Your Bridge to NRS Compliance

Without disrupting the systems you already use.

InvoBridge connects the systems you already use, SAP, Oracle, custom platforms or spreadsheets, directly to the NRS e-invoicing platform.

No rip-and-replace. No reinventing how your business runs.

We handle the validation, submission and compliance steps so your team doesn't have to.

**One Platform.
Every System.
One NRS Connection.**

One Platform, Three Ways to Get Compliant

Whatever your starting point, there is a straightforward path onto InvoBridge.

HAVE AN ERP?

Keep It

Connect your existing ERP or accounting system to InvoBridge. It stays your system of record; InvoBridge handles compliance.

NO ERP?

No Problem

Raise, validate and submit invoices directly through the InvoBridge interface. No ERP required.

NEED FULL ACCOUNTING?

IntelliOps ERP

Our full ERP option, with InvoBridge built in alongside General Ledger, Payables, Receivables and Procurement.

What InvoBridge Does for You

Six reasons finance teams choose InvoBridge.

Connects Any System

Works with the ERP, accounting or billing tools you already use. No replacement required.

Checks Before You Submit

Catches errors before they reach NRS, so you avoid rejections and rework.

Built for Busy Periods

Keeps your business moving during peak trading, even at high transaction volumes.

Secure and Audit-Ready

Every transaction is protected and logged, ready for any compliance review.

No ERP? No Problem

A user-friendly interface lets you raise invoices and submit straight to NRS on InvoBridge.

Ready for Growth

Built on open standards, so you're ready as digital trade expands across Africa.

Why Businesses Trust Infonomics

A decade of enterprise delivery, shaped by direct experience with NRS.

DELIVERY

A Decade of Delivery

Ten years deploying enterprise-grade digital solutions across Nigeria.

EXPERTISE

There From Day One

We worked alongside NRS from the earliest days of the e-invoicing initiative.

CONTROL

Built-In Control

Every submission is checked, logged and traceable, giving Finance, Tax and Audit full confidence.

The Value to Your Business

Four outcomes finance and operations teams feel immediately.

Lower Risk

A proven solution with established integrations minimises uncertainty and speeds up delivery.

Faster Compliance

Pre-built NRS connectors and ready-made rules get you compliant in weeks, not months.

Operational Clarity

One point of control for status, exceptions and resubmissions keeps your teams ahead.

Smarter Cost Management

Reuse what already works and configure only where needed. No expensive bespoke rebuilds.

Your Invoice Journey With InvoBridge

One controlled process from your system to NRS confirmation.

1

Your System

ERP, billing tool or spreadsheet raises the invoice, business as usual.

2

InvoBridge Takes Over

We validate, format and securely submit it to NRS on your behalf.

3

NRS Confirms

The invoice is registered, IRN and QR code issued, status tracked.

4

You Get Reports

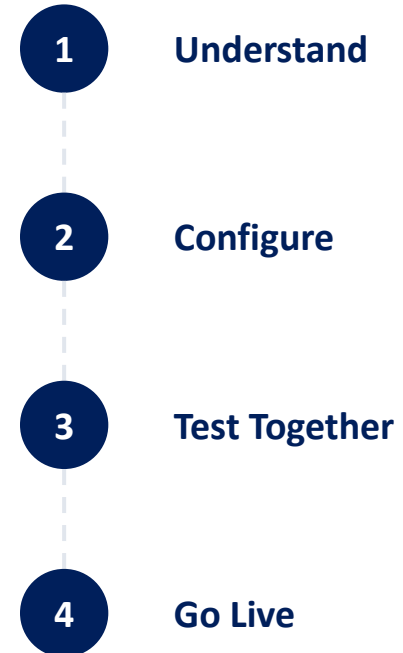

Real-time visibility and exportable reports land with your finance team.

A Smooth Path to Go-Live

We start by understanding how your business already works, not the other way around.

Our team handles setup, configuration and testing, supported by clear documentation and hands-on training, so your finance, sales and operations teams are ready before we go live.

No surprises. No disruption to the business you're already running.

Let's Get Your Business Compliant and Future-Ready

The Bottom Line: reduces costly errors, enhances efficiency, guarantees compliance and prepares your business for scalable digital operations.
