

InvoBridge Solution: Fast-Track ERP-NRS e-Invoicing Compliance

Automated Compliance. Enhanced Security. Future-Ready.
Technical Stakeholders Overview

Infonomics: Trusted By Industry Leaders

Enterprise–Grade Solutions

Over the past ten years, we have deployed scalable and standards–based digital solutions to leading organisations across Nigeria.

NRS e–Invoicing Expertise

Having worked closely with the tax authority from the outset of its e–invoicing initiative, we established reference patterns in data validation, IRN/QR handling, acknowledgements and resubmission controls.

Integration With NRS MBS

Our approach adapts data mappings, implements security protocols and manages credentials in line with client–specific requirements, reducing delivery risk and shortening timelines.

Designed For Compliance & Control

Maker–checker workflows, immutable payload logging and comprehensive traceability are standard, ensuring Finance, Tax and Audit maintain a robust control environment.

Value To Client

Lower Delivery Risk

Leverage a proven solution with established integrations to minimise uncertainty and accelerate delivery.

Faster Compliance

Pre-built NRS connectors, ready-made schemas and validation rules help you achieve compliance in weeks, not months.

Operational Clarity

Gain a single point of control for status, exceptions and resubmissions, keeping Finance and Tax teams always ahead.

Smarter Cost Management

Maximise value by reusing what already works, configuring only where needed, and avoiding expensive bespoke rebuilds.

InvoBridge Overview

Multi ERP Ingestion & Mapping

REST API / Secure File; Field transforms and mapping

Validation & Compliance

Required fields (incl. customer email), Tax/TIN, business rules

NRS Submission

JSON over HTTPS; Real-time API & scheduled batch with retries

Responses & Keys

Capture IRN/QR, ACK/REJECT; Optional write-back to ERP

PDF & Customer Email

Render/attach PDF with embedded QR; Send to ERP
customers/contacts

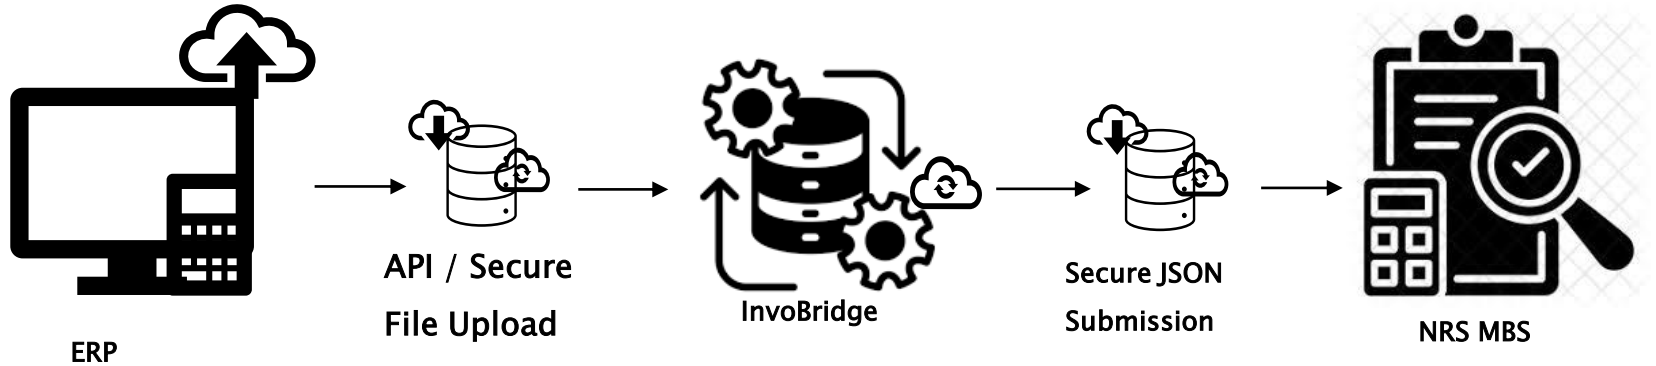

Monitoring & Audit

Dashboard, resubmits, exports; Immutable logs of payloads & emails

Config & Security

Per-entity credentials, templates; OAuth2/TLS, Vault/KMS,
RBAC

Architecture: ERP via InvoBridge

InvoBridge handles

- Validation and Transformation
- Reporting
- IRN / QR Code Generation
- Secure API Communication and Logging

Architecture Details

Architecture style

Lambda-like architecture; API for near/real-time and end-of-day batch to ensure nothing is missed.

Integration Channels

System-to-System

- REST APIs for near/real-time transmission
- Secure File Drop for scheduled batch

Manual User Upload

- Web drag-and-drop file upload
- Supports Excel and flat files
- Validated, processed and queued

Connectors & Data

Connectors

REST API, Secure File Drop (CSV/JSON/XML)

Data Domains

Invoices, Customers (email/contact), Items, Taxes, Cancellations/Adjustments, Payment Status

Mapping Engine

Configurable field mappings & transforms (ERP Invoice/Lines → NRS JSON)

Functions: Validation & Compliance

Pre-Submission Checks

Required fields (e.g. Customer Email, TIN, Tax Breakdown), Totals, Currency rules

NRS Ruleset

Structure, Codes, Date formats, Corrective flows

Business Rules

Maker-Checker can be added on request where required

Functions: Submission To NRS (MBS)

Transport

JSON over HTTPS with OAuth2 credentials per entity

Modes

Real-time (API) and Scheduled Batch (Catch-up / Backfill)

Resilience

Retries 3 times; Dead-Letter Queue (DLQ) for manual retry

Functions: Response Handling

Capture

IRN / QR Code, ACK / REJECT Status, Reference IDs

Status Lifecycle

Pending → Accepted / Rejected → Corrected; Guided Resubmits

Write-Back

Optional Status / Keys update to ERP (e.g. custom fields/tables) available on request

Functions: Monitoring, Communications & Audit

Realtime Views

Queues, Success / Failure, Resubmits

Filters & Drill-Downs

By invoice contents and status

Exports & Schedules

CSV / XLSX exports and scheduled reports

PDF & Customer Email

Render/attach PDF with embedded QR;
send to ERP customers/contacts

Immutable Logs

Payloads, emails and processing history
retained for audit

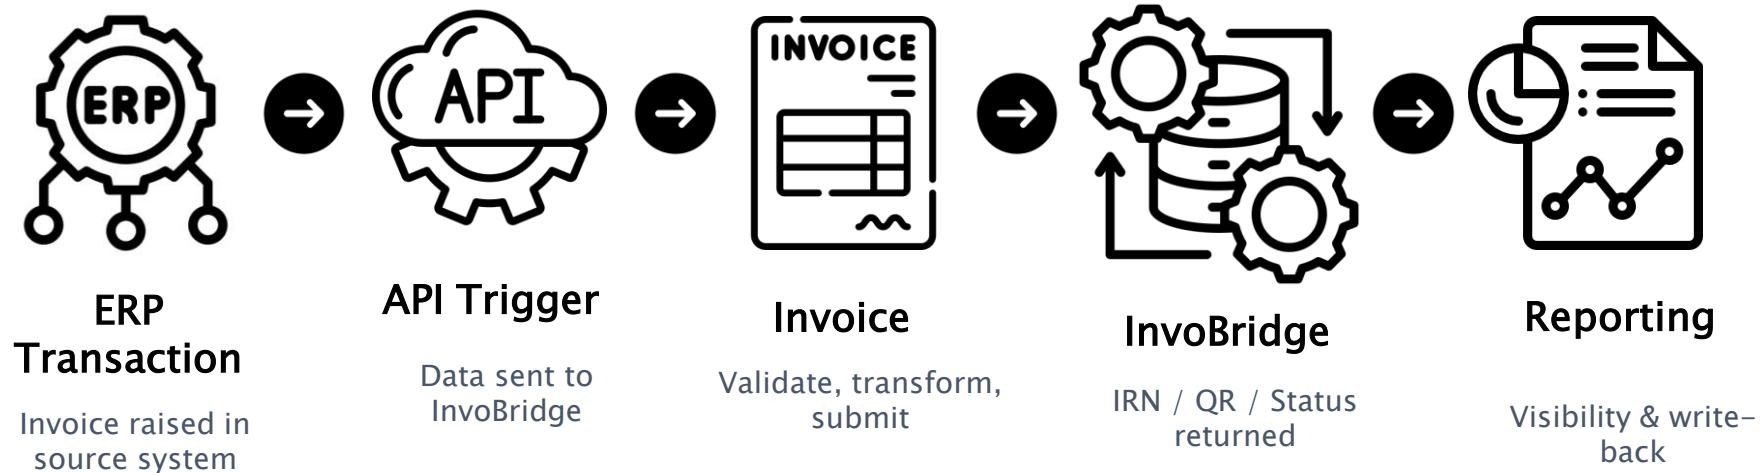

Config & Security

Per-entity credentials, templates;
OAuth2/TLS, Vault/KMS, RBAC

Benefits of Integration via InvoBridge

Criteria	ERP via InvoBridge
Compliance Visibility	✓ High
Audit & Logging	✓ End-to-End
Speed of Implementation	✓ Faster
Scalability	✓ Yes
Integration Cost	✓ Lower
Deployment Risk	✓ Controlled

Demo Flow

Conclusion

- 1 Reduces costly errors by automating critical processes and eliminating manual mistakes.
- 2 Enhances efficiency across teams, freeing up valuable time and resources to focus on growth.
- 3 Guarantees compliance with regulatory requirements, lowering risk and building stakeholder confidence.
- 4 Prepares your business for scalable digital operations; future-ready and equipped to expand seamlessly.
