

InvoBridge

Fast-Track ERP | NRS e-
Invoicing Compliance

Automated Compliance • Enhanced Security • Future-Ready

Infonomics
Insights from Data Assets

Infonomics: Trusted By Industry Leaders

Enterprise-Grade Solutions Proven In Nigeria: Over the past ten years, we have deployed scalable and standards-based digital solutions to leading organizations across Nigeria.

NRS e-Invoicing Expertise: Having worked closely with NRS at the outset of its e-invoicing initiative, we established reference patterns in key areas, including data validation, IRN/QR Codes handling, acknowledgements, and resubmission controls.

Integration With the NRS MBS e-Invoice Platform: Our approach involves adapting data mappings, implementing security protocols, and managing credentials in line with client-specific requirements. This reduces delivery risk and shortens implementation timelines.

Designed For Compliance and Control: Maker-checker workflows, immutable payload logging, and comprehensive traceability are standard features, ensuring Finance, Tax, and Audit functions maintain a robust control environment.

Why e-Invoicing matters

Why e-Invoicing Matters

It is mandatory

NRS e-invoicing is now the law. There is no opting out for businesses in scope.

Cost of waiting

Errors, missed submissions, penalties and reputational damage await those who treat it as an afterthought.

The real opportunity

Businesses that get ahead turn a compliance deadline into a smarter, more digital way of working.

Who Needs to Comply, and When

NRS e-invoicing is being rolled out in phases. Exact dates are set by NRS and can change.

LARGE

**Above ₦5 billion
revenue / year**

Already required to comply.
Rollout started late 2025.
Compliance monitoring is active.

MEDIUM

**₦1 billion – ₦5 billion
revenue / year**

Being brought in during 2026.
Onboarding and go-live
are underway this year.

ALL OTHER

**Other VAT-registered
(incl. small businesses)**

Expected to join by 2027
under the new tax law.
Full mandatory later.

Introducing InvoBridge

Your bridge to NRS compliance, without disrupting the systems you already use.

One Platform. Every System. One NRS Connection.

InvoBridge connects the systems you already use: SAP, Oracle, custom platforms or spreadsheets, directly to the NRS e-invoicing platform. No rip-and-replace. No reinventing how your business runs.

Works with your ERP

Or Excel, API, file drop,
or native screens

Validates before submit

Catch errors before
they reach NRS

Secure Gateway / APP

Approved route to NRS
MBS

Full visibility

Status, retries, audit
trail

Terms You'll Hear

Simple explanations for finance, tax and business stakeholders.

NRS

Nigeria Revenue Service – the tax authority (used to be called FIRS).

MBS

Merchant Buyer Solution – the government platform that receives e-invoices.

APP

Access Point Provider – an approved company (like Infonomics / InvoBridge) that connects a business to NRS.

IRN

Invoice Reference Number – a unique ID NRS gives each approved invoice.

QR Code

A scannable code added to an invoice once NRS approves it, so anyone can verify it's genuine.

Your Invoice Journey With InvoBridge (The Process)

One controlled process from your system to NRS confirmation.

1

Your System

ERP, billing tool or spreadsheet raises the invoice as usual.

2

InvoBridge

Validates, formats and prepares the compliant payload.

3

NRS MBS

Secure submission via Gateway / Access Point.
IRN & QR issued.

4

You See Results

Real-time status, reports, retries and full audit trail.

What InvoBridge Does for You

Connects any system

Works with the ERP, accounting or billing tools you already use. No replacement required.

Checks before you submit

Catches errors before they reach NRS, so you avoid rejections and rework.

Built for busy periods

Keeps your business moving during peak trading, even at high transaction volumes.

Secure and audit-ready

Every transaction is protected and logged, ready for any compliance review.

No ERP? No problem

A user-friendly interface lets you raise invoices and submit straight to NRS on InvoBridge.

Ready for growth

Built on open standards, so you're ready as digital trade expands across Africa.

The Value to Your Business

Lower Risk

A proven solution with established integrations minimises uncertainty and speeds up delivery.

Faster Compliance

Pre-built NRS connectors and ready-made rules get you compliant in weeks, not months.

Operational Clarity

One point of control for status, exceptions and resubmissions keeps your teams ahead.

Smarter Cost Management

Reuse what already works and configure only where needed. No expensive bespoke rebuilds.

Why Businesses Choose InvoBridge

What Matters	With InvoBridge
Compliance Visibility	✓ High
Audit & Logging	✓ End-to-End
Speed to Go-Live	✓ Faster
Scalability	✓ Yes
Cost to Integrate	✓ Affordable
Deployment Risk	✓ Controlled

Security, Control & Audit Readiness

How InvoBridge protects invoice data and keeps Finance, Tax and Audit teams in control.

Secure exchange

Invoices move through an approved Gateway / Access Point route with encrypted communication to NRS.

Controlled before submission

Validation and approval steps mean only cleared invoices are sent. Incomplete or unauthorised invoices stay inside.

Full audit trail

Every status change, approval and response is logged. Evidence is available for internal review or external audit.

Access control

Role-based access and per-entity credentials keep the right people able to see and act on the right invoices.

A Smooth Path to Go-Live

We start by understanding how your business already works — not the other way around.

1

Understand

Invoice sources,
process, controls and
data

2

Configure

Integration, validation
and approval rules

3

Test Together

End-to-end invoice and
response scenarios

4

Go Live

Deploy, monitor,
support and report

No surprises. No disruption to the business you're already running.

What Happens After Go-Live

InvoBridge is built for ongoing operations — not just the go-live day.

01

Monitoring

Dashboards show queued, sent, accepted, rejected and failed invoices so teams stay ahead of issues.

02

Exception handling

Clear error information and guided retries help correct and resubmit failed invoices quickly.

03

Reporting & evidence

Exportable reports and full processing history support finance, tax and audit needs.

04

Ongoing support

Configuration updates, training refreshers and operational support keep the process running smoothly.

Why Businesses Trust Infonomics

A Decade of Delivery

Ten years deploying enterprise-grade digital solutions across Nigeria.

There From Day One

We worked alongside the tax authority from the earliest days of the e-invoicing initiative.

Built-In Control

Every submission is checked, logged and traceable; giving Finance, Tax and Audit full confidence.

A Partner, Not Just a Vendor

We adapt to your systems and your team, not the other way around.

The Bottom Line

- 1 Reduces costly errors by automating critical processes and eliminating manual mistakes.
- 2 Enhances efficiency across teams, freeing up valuable time and resources to focus on growth.
- 3 Guarantees compliance with regulatory requirements, lowering risk and building stakeholder confidence.
- 4 Prepares your business for scalable digital operations; future-ready and equipped to expand.

Thank You

Let's get your business compliant and future-ready.
