Turning e-Invoicing Compliance Into a Business Advantage

Automated Compliance • Enhanced Security • Future-Ready Business

An Infonomics Solution

THE MANDATE

e-Invoicing is now the law of business

It's Mandatory

The Nigeria Revenue Service requires structured, real-time e-invoicing for in-scope businesses. There is no opting out.

The Cost of Waiting

Errors, missed submissions, penalties and reputational damage await businesses that treat this as an afterthought.

The Real Opportunity

Businesses that move NRSt turn a compliance deadline into a smarter, more controlled and digital way of working.

INTRODUCING INVOBRIDGE

Your bridge to compliance — without disruption

InvoBridge is Infonomics' ready-to-deploy solution that connects the systems you already use — SAP, Oracle, custom platforms or spreadsheets — directly to the NRS e-invoicing platform.

One Platform

A single control layer for capture, validation, approval, submission and monitoring.

Every System

Works with your existing ERP, accounting tools, files or native entry. No rip-and-replace.

One Connection

Secure Gateway / Access Point route to NRS. We handle the complexity.

No ERP? No problem. A user-friendly interface lets you raise invoices and submit straight to NRS right on InvoBridge.

WHY BUSINESSES TRUST INFONOMICS

Proven in Nigeria. Built for e-invoicing.

A Decade of Delivery

Ten years deploying enterprise-grade digital solutions to leading organisations across Nigeria.

There From Day One

We worked alongside the tax authority from the earliest days of the e-invoicing initiative and established reference patterns for validation, IRN/QR and resubmission.

Built-In Control

Every submission is checked, logged and traceable — giving Finance, Tax and Audit teams full confidence.

A Partner, Not Just a Vendor

We adapt to your systems and your team, not the other way around. Progressive adoption, not forced change.

MORE THAN COMPLIANCE

Turn every invoice into business insight

Every e-invoice already carries valuable information about your customers, products, taxes and cash flow. Most businesses only ever see it as a tax form.

With InvoBridge, that same data becomes a live feed into smarter cash-flow forecasting, vendor spend visibility, customer activity and purchasing trends — so compliance starts paying you back.

From tax form → to insight engine

WHAT INVOBRIDGE DOES FOR YOU

Six practical outcomes that matter

Connects Any System

Works with the ERP, accounting or billing tools you already use. No replacement required.

Checks Before You Submit

Catches errors before they reach NRS, so you avoid rejections and rework.

Built for Busy Periods

Keeps your business moving during peak trading, even at high transaction volumes.

Secure and Audit-Ready

Every transaction is protected and logged, ready for any compliance review.

No ERP? No Problem

A user-friendly interface lets you raise invoices and submit straight to NRS — no system integration needed.

Ready for Growth

Built on open standards, so you're ready as digital trade expands across Africa.

What you gain by moving now

Lower Risk

A proven solution with established patterns minimises uncertainty and speeds delivery. Validate before submission so rejections don't reach the customer.

Faster Compliance

Pre-built connectors, ready-made schemas and validation rules get you compliant in weeks, not months.

Operational Clarity

One point of control for status, exceptions and resubmissions keeps Finance and Tax ahead of the curve.

Smarter Cost Management

Reuse what already works. Configure only where needed. Avoid expensive bespoke rebuilds.

What matters when you compare options

What Matters	With InvoBridge
Compliance Visibility	High — single operating view
Audit & Logging	End-to-end, immutable
Speed to Go-Live	Faster — pre-built patterns
Scalability	Yes — multi-entity, multi-source
Integration Cost	Controlled — configure, don't rebuild
Deployment Risk	Lower — proven approach

YOUR INVOICE JOURNEY WITH INVOBRIDGE

Business as usual for your teams. Compliance handled.

1

Your System

Your ERP, billing tool or spreadsheet raises the invoice — business as usual.

2

InvoBridge Takes Over

We validate, format and securely submit it to NRS on your behalf.

3

Authority Confirms

The invoice is registered, IRN and QR issued, and status tracked.

4

You Get Visibility

Real-time status, exception handling and exportable reports land with your team.

A SMOOTH PATH TO GO-LIVE

We start by understanding how your business already works

Our team handles setup, configuration and testing, supported by clear documentation and hands-on training, so your finance, sales and operations teams are ready before we go live. No surprises. No disruption to the business you're already running.

1

Understand

Map your invoice
sources, process and
controls

2

Configure

Integration, validation
rules and approval
workflows

3

Test Together

End-to-end scenarios
with real response
handling

4

Go Live

Monitored production
with support and training

What implementing InvoBridge delivers

1

Fewer costly errors

Automate critical processes and eliminate manual mistakes before invoices reach the authority or the customer.

2

Higher team efficiency

Free Finance, Tax and Operations from firefighting so they can focus on growth and control.

3

Guaranteed compliance posture

Lower regulatory risk and build stakeholder confidence with a controlled, auditable process.

4

Future-ready operations

A scalable foundation that supports higher volumes, more entities and expanding digital trade.

invoBridge

Let's get your business compliant — and future-ready.

Schedule a discovery conversation or readiness assessment.

We'll map your current landscape and show the fastest path to controlled compliance.
