

InvoBridge: NRS e-Invoicing compliance in one controlled business process

A business-ready platform for creating, validating, approving, submitting and monitoring compliant invoices without disrupting existing ERP/accounting operations.

What NRS Requires

All businesses generating above 1-billion-naira revenue to send all invoices to NRS e-invoicing platform within 20 days of generating the invoices

What users can do on InvoBridge

Finance, tax and operations teams can run the full invoice-to-compliance lifecycle from a single, auditable workspace.

CREATE / CAPTURE

Raise invoices directly, upload Excel files, receive ERP/API transactions or process files from MFT/watch folders.

VALIDATE

Check mandatory fields, tax values, structure, customer/supplier data and invoice readiness before submission.

APPROVE

Apply internal review and approval controls so only cleared invoices move forward to regulatory submission.

SUBMIT

Generate compliant payloads and dispatch approved invoices through the Gateway / Access Point route.

TRACK

Monitor queued, sent, successful, rejected and failed invoices with clear operational status visibility.

RESOLVE / REPORT

Review exceptions, retry failed items, preserve audit evidence and produce management/compliance reports.

Executive message: InvoBridge gives management a single operating control layer for compliant enterprise invoicing.

What each team gets from InvoBridge

InvoBridge is positioned as an operational workspace for finance, tax, IT and management — not just a technical transmission tool.

Business users

● Finance / Billing

Create or import invoices, validate values, confirm readiness and track submission outcomes.

● Tax / Compliance

Ensure invoices meet NRS rules, review rejections, manage evidence and compliance reporting.

● Operations

Monitor queues, exceptions, retries and payment update processing.

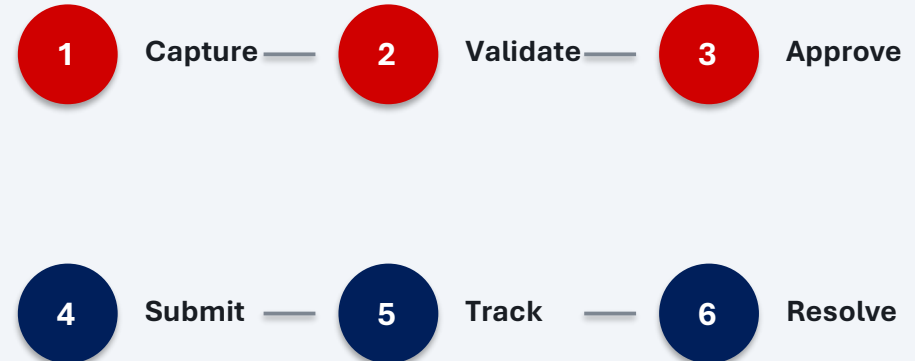

● IT / Integration

Connect ERP/accounting sources, file channels and APIs without changing the core systems.

● Management

View status, risk, exceptions and operational KPIs across entities and invoice sources.

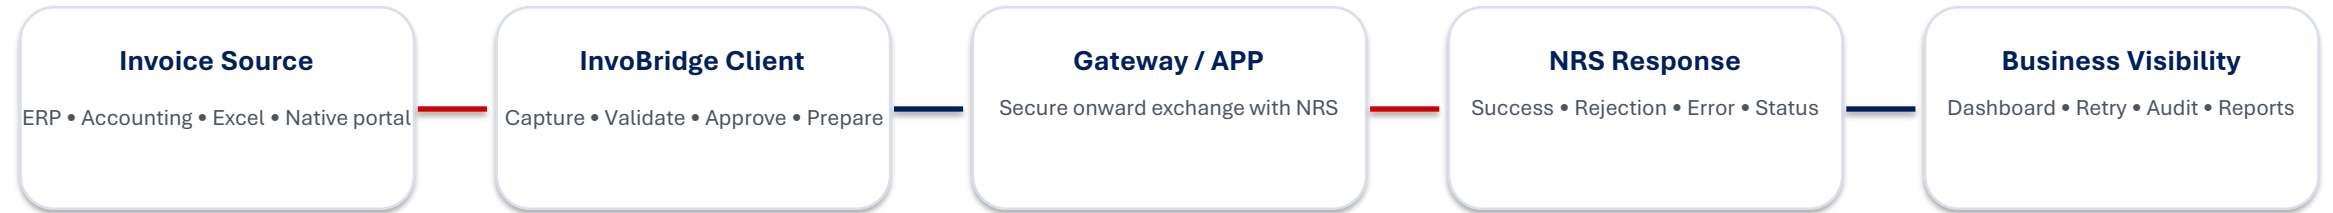

Typical user flow

The practical outcome is fewer manual handoffs, earlier error detection, clearer responsibility and stronger audit readiness before and after submission to NRS.

How InvoBridge delivers NRS readiness

A simple business journey from invoice source to compliance confirmation.

BUSINESS IMPACT

- Reduces manual compliance processing and preventable invoice rejections.
- Creates one monitored operating process across entities and invoice sources.
- Improves finance, tax, operations and audit visibility from day one.

PROPOSED ENGAGEMENT

- Assess current invoicing, ERP and integration landscape.
- Configure client integration, validation and approval controls.
- Deploy Gateway / Access Point route, test, go live and support operations.

Bottom line: InvoBridge gives management a controlled, auditable and scalable path to NRS e-invoicing compliance.
